

## ***THE PRACTICAL PHILOSOPHERS* Concept Illustrations**

Using the identification packet and article THE PRACTICAL PHILOSOPHERS, create two concept illustrations. Use two sides of a sheet of blank paper, one illustration each side.

1] Draw a cartoon depicting the 5 rulers mentioned in the article at a science fair hosted by the Royal Society of London. King Louis XIV, King James II of England, Leopold I of Austria, Frederick William Hohenzollern & his Great Grandson Frederick The Great should all be in attendance. In the illustration identify each as clearly as possible and provide a dialogue bubble that expresses their views toward science. Be sure to provide a clever title that encompasses the spirit of the event.

2] On the backside, draw the following men with a visual representation of their Science Fair Model or concept. At the fair should be Roger Bacon, Nicholas Copernicus, Andre Veslius, Johannes Kepler, William Harvey, Rene DeCartes, Galileo, Francis Bacon & Sir Isaac Newton. Provide a brief explanation of their main scientific contribution at the fair. Again, Make sure a clever title sums up the spectacle.
